(Developed c. 1982)

Multi-Directional  
Drainage Pattern

Works Behind All  
Cladding Types

Moisture Draining

Moisture Ponding-  
increasing the chance of mold growth

Actual Photos

Let's face it. Housewrap technology has changed little in the last 25 years. That is, until now. VALÉRON VORTEC™ EVD™ is the industry's first and only multi-directional drainage barrier. VALÉRON VORTEC™ EVD™ features everything you would expect in today's housewrap with the addition of tomorrow's drainage technology.

Building tools have evolved over the years. Building technology has advanced. Why use the same old housewrap?

VALÉRON VORTEC. DESIGNED TO DRAIN.™
